Currently attending a programming bootcamp, I enjoy to prove myself with different challenges. My background is in the finance area and thanks to that I can bring analytical and financial management along with skills such as critical thinking, problem-solving, organization, and adaptability. I would define myself as a quick learner and a team-worker with a strong work ethic.

KEY SKILLS

HTML |CSS | JS | NODE.JS |Project planning | Agile practices | Scheduling |Risk management | Regression analysis | Data visualization | Financial analysis | Internal and external stakeholder management |

PAST PROJECTS

Event Finder
- The application allows an user to search for a city and displays the map pointing at that location and a list of events taking place in the area
- Built with HTML, CSS (BULMA library), JS, Third party APIs
- Link to the project https://ekubik.github.io/event-finder/
